

Remuda Ranch has treated more than 9,000 eating disorder patients, with a 95% success rate. We have recently expanded and now offer four programs:

Eating and anxiety disorders are on the rise in the male population, which is why we opened this 60-day program for boys, 17 and under. ReddStone provides intensive treatment for boys with eating or anxiety disorders.

ReddStone A REMUDA PROGRAM FOR BOYS

Today, anxiety is the most common psychiatric disorder to occur in young people. A full 13% of women and girls, or approximately 20 million people, experience some kind of anxiety issue. Our Anxiety Program offers inpatient, age-appropriate treatment to women, adolescent girls and children with anxiety disorders, including OCD.

Anxiety Program AT REMUDA RANCH

When inpatient treatment is not indicated, Remuda Life provides the option of a residential level of care. Women and girls can admit directly from outpatient care, or come to Life as a transition between inpatient care and home. Life also offers an Emotional Eating Program for those with Obesity, Compulsive Overeating and Binge-Eating Disorder.

Remuda Life RESIDENTIAL PROGRAMS

Eating disorders remain epidemic throughout our country. Remuda Ranch provides intensive inpatient treatment for women and girls with anorexia and bulimia. Our 45 to 60 day, age-appropriate programs ensure that patients are involved exclusively with their own peer group and receive treatment from professionals specializing in that specific age group.

Remuda Ranch INPATIENT PROGRAMS

Remuda Programs are located in Arizona and Virginia. All programs are Christian-based, multi-disciplinary and utilize the highly effective Remuda Model of Treatment. For additional information, please call 1-800-445-1900 or visit www.remudaranch.com.

Why Remuda? Because it works.
