February 20, 2009

The Grove School, a therapeutic boarding school, has recently expanded to accommodate 10 additional students in its therapeutic day program. This brings the total enrollment to 115 students. The therapeutic day program offers local students an opportunity for individualized education, structured after school activities and clubs and the clinical support of individual, group and family therapy. Grove continues to develop its Middle School program from students in grades 6 through 8.

In addition to its therapeutic boarding school, Grove has also acquired another 4 bed home for the Transition program, creating an enrollment of 12 students. The Transition program, started in 2008, serves young adults who have graduated from high school that need additional support and structure as they emerge into adulthood. Students attend community college, work in the community, and participate in the clinical services at Grove School.
